

WHY THE PROGRAMS NOW CONNECT

Before: 12 separate boxes, each at its own angle, joined only by paths. After: ONE building that follows the hill.

ONE BUILDING

All program sits in a single ring at the foot of Shimla Pahari, following the surveyed +8' contour — so the form comes from the hill, not from boxes.

ONE PUBLIC GALLERY

A 12 ft colonnaded gallery runs the full loop on the hill side. Every room opens onto it, so anyone can walk from the cafe to the library, archive, newsroom and back.

CHAINS OF RELATED ROOMS

Knowledge: library → archive consultation → archive stores → research. Production: research → (boardwalk) → newsroom → editorial → recording → editing → print. Public: forum → entry hall + cafe → bookshop → exhibition → press conference → auditorium → workshops.

THE HILL IS SHARED

Three stairs climb from the gallery to the open summit forum. The auditorium's seats rake up the existing slope (+8' → +16'), with the stage on the gallery line — no cutting.

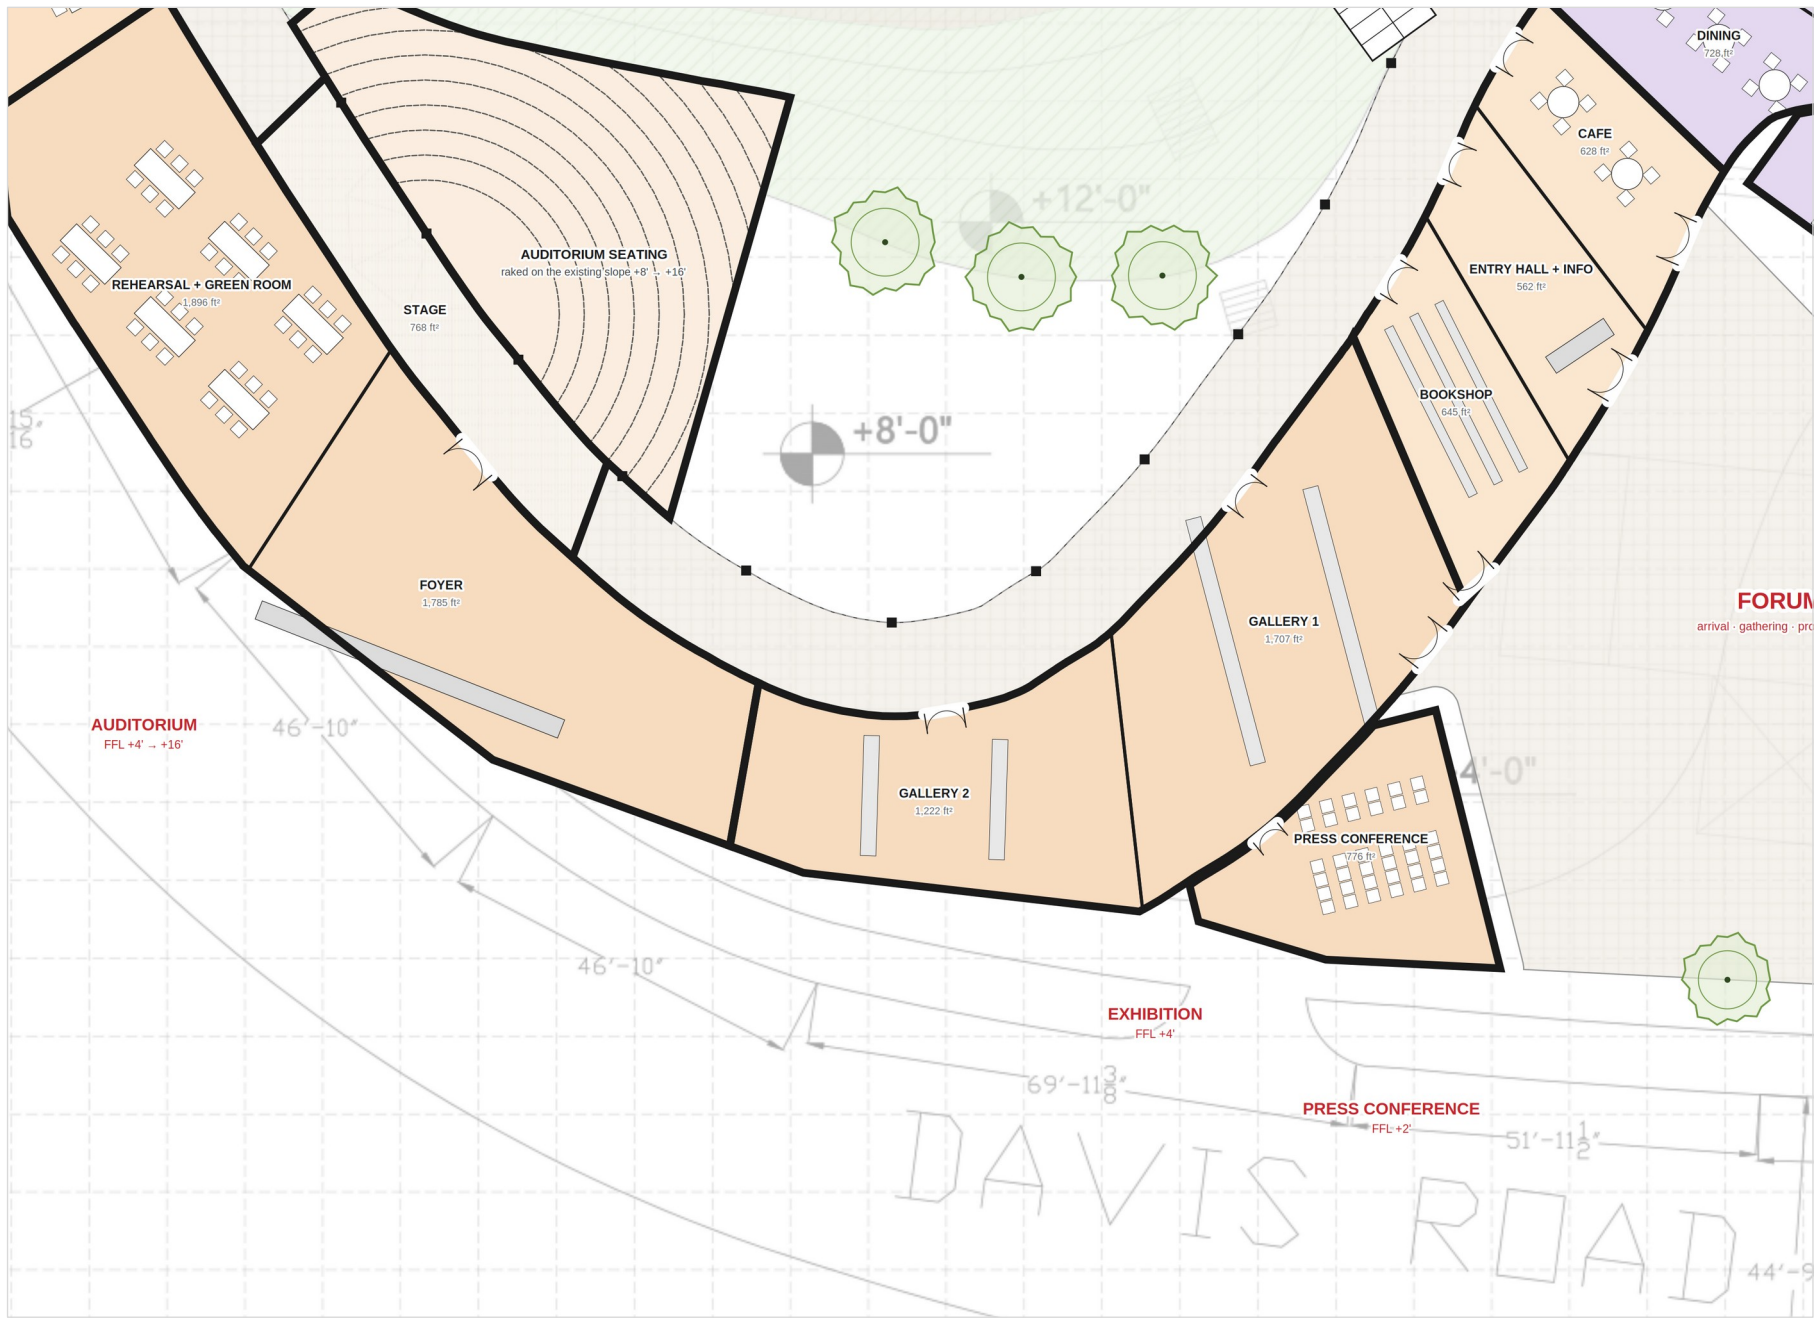

ARMS REACH THE CITY

Press conference, games and print push out from the ring toward Davis Road and frame the entry forum, the protest edge.
